OF ACCIDIONATION SECRET

50X1-HUM

SECRU. - 2 received infantry training on the training ground south of the Trost Kaserne. Two soldiers who were supervised by an instructor practiced the emplacing of an air-cooled heavy machine gun on a wheeled carriage which was presumably the 1943 model. Gun fire was heard from the direction of the target range in the area of the training ground from where, after a while, an ermored fulltrack vehicle emerged. Due to the large distance the vehicle could not be identified as a tank or SP gun. Two T-34/85 tanks and 3 trucks were observed in the area of the repair shop at 109 to 111 Trost Strasse. About 25 motor vehicles which were parked at the carage at 83 Pernerstorfer Gasse included trucks 50X1-HUM Other motor vehicles observed with a driver wearing at the installation included truck and van-like black-bordered red epaulets and jeep with drivers wearing red-bordered black motor vehicle epaulets. 50X1-HUM Comment. The 46th Gds Mech Regt and the 8th Gds Engr Bn are stationed at Klosterneuburg. The motor vehicles and the equipment of these units are stored in the former Pionier Museum. In view of previous information, it appears unusual that the entire regiment, possibly also the engineer battalion, have moved to the training grounds in January. A short move of the several component units of the regiment to the troop training grounds for firing practices in January, however, corresponds to the Soviet training policy observed and in East Germany. 50X1-HUM 2. Comment. The 44th Gds Mech Regt is stationed at the Trost Kaserne. It is believed that the armored half-track vehicles mentioned in the present report are model US-M 3 half-track armored personnel carriers. The two T-34/85 tanks belong to the 127th Tank Bn which is subordinate to the 44th Gds Mech Rogt. The motor-vehicle observed at the garage 50X1-HUM at 83 Pernerstorfer Gasse belong to the 13th Gds Mech Div. The motor vehicles observed at the Trost Kaserne belong to the Central Group of Forces in Vienna and Baden.
